

# GhostNet

## SOC Threat Detection Report

Generated: June 12, 2026 21:17 UTC

|              |          |      |        |     |      |
|--------------|----------|------|--------|-----|------|
| 56           | 8        | 15   | 33     | 0   | 0    |
| Total Alerts | CRITICAL | HIGH | MEDIUM | LOW | INFO |

## Executive Summary

GhostNet detected **56 alerts** across **3 monitored agents** in this reporting period. Of these, **8 CRITICAL** and **15 HIGH** severity alerts require immediate attention. The MITRE ATT&CK; auto-mapper identified **10 unique techniques** across the kill chain. Priority focus areas: Initial Access, Execution, and Defense Evasion.

## Top Priority Alerts

| Severity | Agent             | Level | Description                                              | MITRE            |
|----------|-------------------|-------|----------------------------------------------------------|------------------|
| CRITICAL | win11-workstation | 12    | Application Compatibility Database launched              | T1053.005, T1059 |
| CRITICAL | win11-workstation | 12    | Application Compatibility Database launched              | T1053.005, T1059 |
| CRITICAL | win11-workstation | 12    | Sysmon - Suspicious Process - taskhost.exe               | T1053.005, T1059 |
| CRITICAL | win11-workstation | 12    | Sysmon - Suspicious Process - taskhost.exe               | T1053.005, T1059 |
| CRITICAL | win11-workstation | 12    | Application Compatibility Database launched              | T1053.005, T1059 |
| CRITICAL | win11-workstation | 12    | Sysmon - Suspicious Process - taskhost.exe               | T1053.005, T1059 |
| CRITICAL | win11-workstation | 12    | Sysmon - Suspicious Process - taskhost.exe               | T1053.005, T1059 |
| CRITICAL | win11-workstation | 12    | Sysmon - Suspicious Process - taskhost.exe               | T1053.005, T1059 |
| HIGH     | ubuntu-webserver  | 10    | Multiple web server 400 error codes from same source ip. | T1595.003, T1190 |
| HIGH     | ubuntu-webserver  | 10    | Multiple web server 400 error codes from same source ip. | T1595.003, T1190 |

## MITRE ATT&CK; Coverage

| Technique ID | Name | Hit Count |
|--------------|------|-----------|
|--------------|------|-----------|

|           |                                   |    |
|-----------|-----------------------------------|----|
| T1053.005 | Scheduled Task                    | 16 |
| T1059     | Command and Scripting Interpreter | 16 |
| T1078     | Valid Accounts                    | 16 |
| T1014     | Rootkit                           | 13 |
| T1112     | Modify Registry                   | 13 |
| T1190     | Exploit Public-Facing Application | 10 |
| T1595.003 | Wordlist Scanning                 | 8  |
| T1565.001 | Stored Data Manipulation          | 8  |
| T1072     | Software Deployment Tools         | 5  |
| T1110     | Brute Force                       | 3  |

## Alert Distribution by Agent

| Agent             | Alert Count |
|-------------------|-------------|
| win11-workstation | 24          |
| ubuntu-webserver  | 24          |
| ubuntu-local      | 8           |

## Recommendations

|          |                                                                                                                                                    |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| CRITICAL | Investigate AppCompat Database launches on win11-workstation — cross-reference with T1546.011 persistence indicators and recent software installs. |
| HIGH     | Review multiple web 400 errors from single IPs — validate whether nikto/scanner activity represents authorized pen testing or external recon.      |
| MEDIUM   | Harden CIS benchmark compliance on win11-workstation — current score below 30%. Priority: password policy, audit logging, sandbox restrictions.    |
| MEDIUM   | Enable SSH on ubuntu-webserver to close NullByte brute force detection gap and achieve 100%% adversary simulation coverage.                        |
